Our goal in the Horticulture Greenhouse at Columbia River HS, is to provide food plants for our community and plants that support the ecosystem by attracting pollinators. With food prices at an all time high, we want to encourage our supporters to plant their own gardens. The food you will grow is non-gmo, never sprayed with pesticides, and started in excellent soil. Many of our seeds are heirloom with the intention of preserving plant genetics. If you would like help planning your garden, just ask and someone and we will "bee" happy to help!
